

Aviation & Maritime

Profile

FBC's Aviation and Maritime team has extensive experience in representing airlines (including major airlines and low-cost carriers), insurers, importers and exporters, freight forwarders, and other stakeholders in the industry in the full range of matters encompassed by aviation and maritime laws. FBC's team has particular expertise in commercial litigation, class actions, corporate and regulatory matters, leasing and other commercial transactions, competition, labor relations and taxation.

Members of the FBC team have been active participants in both the Israeli legislative process as well as in industry organizations, including IATA, in regard to aviation and maritime laws. FBC's clients benefit directly from this involvement, as the team is well-positioned to provide ongoing up-to-date regulatory advice and to promptly update on pending developments in these fields.
